

The sources behind the desk.

Every signal on PSP SignalDesk is verified against primary sources before it reaches a subscriber. This document lists the one hundred most-cited sources in the live corpus — ministries and regulators read at source in Bahasa Indonesia and seven other languages, central banks and multilateral institutions, legal and professional publishers, and the region's credible press. The list is representative, not exhaustive: the live corpus draws on 3,694 unique named sources this week.
